

Anton Emery

Full Stack Web Developer

SUMMARY

Self-taught from an IT education, I thrive in environments that expect a high degree of personal ownership and agency. I have a reputation for patience and gumption, and I seek out and support those qualities in my teammates. I love working on “the back of the front end” - Building and maintaining a pixel-perfect, flexible, and heavily-tested library of design components.

EXPERIENCE

Senior Front End Developer

[Rivermeadow](#) Workload Mobility Platform

Dec 2024 - present 10 devs Remote

- **Front End Migration** - Led project to migrate 10 year old front end stack from Backbone to React
- **Improve Javascript Tooling** - Migrated legacy Grunt build system to Webpack, allowing us to bundle React code
- **CSS Refactor** - Refactor Sass styles to be scoped by component, improving maintainability and organization.
- **UI Update** - Integrate Ant Design Component Library and work with Design dept to build out a design system.

[React](#) [Backbone](#) [Webpack](#) [Sass](#) [Javascript](#)

Software Engineer / Full Stack Developer

[HiringThing](#) HR platform for hiring & recruitment

June 2022 - July 2024 (staff reduction) 10 devs Remote

- **AI Resume Analysis Feature** - Led front end development integrating ChatGPT
- **Applicant Tracking Software (ATS) feature** - Developed both back & front end; implemented tests using Jest & Cypress
- **Storybook Design System** - Working from Figma specs, designed and maintained a robust library of components
- **Engineer in Training Program** - Created our EIT documentation and provided mentorship and guidance
